Roundabout Design and Vehicle Turning Simulations

Transoft will be hosting a one-hour webinar about their latest software solutions and how they can help engineers:
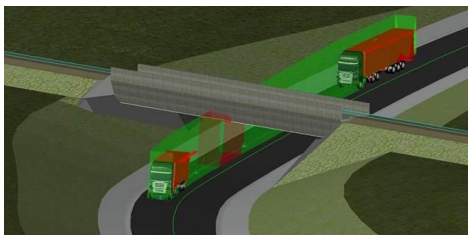

- Increase productivity
- Easily explore design options and alternatives
- Optimize designs while minimizing rework
- Evaluate safety and standard compliance

What's in it for you:

- Learn the tools used by Local Cities and Texas Department of Transportation.
- Be equipped with practical tools to join the workforce.
- Learn the most specialized and advanced tools in the industry.

Software Focus:

AutoTURN® Pro	TORUS™

Speakers

Hannah Khosravi is a Civil Designer living and working in Vancouver, Canada. She has over five years of experience in road design and traffic consulting, including two years' experience in researching and developing solutions for road, intersection and roundabout design projects. Hannah has B.A.Sc. in civil engineering.

Andres Velez is a Civil Engineer with over 10 years of experience in the transportation industry. 5 years in the Aviation sector as Operations Planning Director, in charge of coordinating design, construction and operations projects for Eldorado International Airport. 5 years in the transportation and civil engineering space, developing solutions for checking roadway design projects.
