BUREAU of PUBLIC ROADS

THE 1967 STATE LINE VEHICLE CLASSIFICATION STUDY

During the three summer months of June, July and August, 1967, a single twenty-four hour vehicle classification count was made on ninety-nine highway crossings of the Texas State Line. These counts were made on weekdays only, Monday through Friday.

In general, standard vehicle type classifications were used in the study. Passenger cars were classified according to registration in, (1) Texas, (2) adjacent county in bordering states, (3) other counties in bordering states and (4) other states or Mexico. State of registration of trucks was not obtained. They were grouped into two main classifications, (1) single units and (2) combinations. Each of these groups was further classified by size and by number and arrangement of axles.

A twenty-four hour total of 270,467 vehicles passed through the ninety-nine state line classification stations. This volume consisted of 206,384 passenger cars, 60,964 trucks, 2404 buses and 715 motorcycles and motor-scooters. One hundred thirty-five thousand two hundred nine (49.99%) of these vehicles were entering the State of Texas and 135,258 (50.01%) were leaving the State.

The number of stations counted on highways entering each border state, the number of vehicles recorded at these stations, and the per cent of total traffic which was entering and leaving Texas via each bordering state is shown in the following tabulation:

TOTAL VEHICLES CROSSING EACH STATE LINE					
State	Number of Stations	Vehicles Recorded	Per Cent of Total	Per Cent	
				Inbound	Outbound
Arkansas	5	27,820	10.29	48.69	51.31
Louisiana	15	36,710	13.57	51.68	48.32
New Mexico	31	54,503	20.15	49.87	50.13
Oklahoma	32	53,283	19.70	50.61	49.39
Rep. of Mexico	16	98,151	36.29	49.46	50.54
Total	99	270,467	100.00	49.99	50.01

Of interest is the number of vehicles observed on individual highway systems. The tabulation below indicates the number of stations on the various Federal Aid Highway Systems and the vehicle usage of these systems at the State Line.

VEHICLE CROSSINGS BY HIGHWAY SYSTEM			
FA System	Number of Stations	Number of Vehicles	Per Cent Usage
FAI	9	86,368	31.93
FAP	38	114,295	42.26
FAS	40	34,907	12.91
NON FA	12	34,897	12.90
Total	99	270,467	100.00

Of the 206,384 passenger cars recorded at all stations 103,095 (49.95%) were entering and 103,289 (50.05%) were leaving Texas. Texas registered automobiles crossing the state numbered 121,476; 49 per cent were inbound and 51 per cent outbound.

Forty-one per cent, 84,908 of the passenger cars crossing the Texas State Line were registered in other states; 36,801 (43%) of those registered in other states were registered in the adjacent county of the bordering state or the adjacent state in Mexico. The number of out-of-state passenger cars crossing the state line into or from the adjacent states is summarized in the table below which is extracted from the registration table on the following page.

OUT-OF-STATE PASSENGER CARS AND STATE OF ENTRY OR EXIT					
State	Adjacent County	Other Counties Adjacent State	Adjacent State Total	Other States	Total
Arkansas	4,743	3,044	7,787	3,135	10,922
Louisiana	7,628	3,172	10,800	3,500	14,300
New Mexico	8,160	2,398	10,558	9,983	20,541
Oklahoma	6,006	5,873	11,879	9,220	21,099
Rep. of Mexico	10,264	1,234	11,498	6,548	18,046
Total	36,801	15,721	52,522	32,386	84,908

PASSENGER CAR REGISTRATION AT STATE LINES

Other States (U. S.)	6,548	8.04	47.83	52.17
Total	<u>81,418</u>	<u>100.00</u>		

Of the 60,964 trucks recorded at all stations 50.17 per cent were entering and 49.83 per cent were leaving Texas. There were 47,202 single-unit two and three axle trucks and 13,762 multiple axle truck combinations of various types. Over 40,000 of the single-unit trucks were pick-ups and panels. The number of commercial vehicles by type entering and leaving Texas follows:

COMMERCIAL VEHICLES AT STATE LINE	
<u>Panel and Pick-ups</u> 20,301 or 50.41% entering 19,969 or 49.59% leaving	<u>Other 2-Axle</u> 2,865 or 49.24% entering 2,953 or 50.76% leaving
<u>3-Axle</u> 558 or 50.09% entering 556 or 49.91% leaving	<u>Semi-Trailer Combinations</u> 6,543 or 49.86% entering 6,581 or 50.14% leaving
<u>Semi-Trailer - Trailer</u> 161 or 50.79% entering 156 or 49.21% leaving	<u>Truck Trailer</u> 160 or 49.84% entering 161 or 50.16% leaving
<u>Buses</u> 1,175 or 48.88% entering 1,229 or 51.12% leaving	<u>Motorcycles and Scooters</u> 351 or 49.09% entering 364 or 50.91% leaving

The total volume on the nine interstate highways at the state line was 86,368 vehicles or almost 32 per cent of the total recorded at all state line crossings in a twenty-four hour period. Interstate Highway 10 at Orange (11,148) IH 35 at Laredo (13,607) and IH 110 at El Paso (24,304) carried a volume of 49,059 vehicles or over 56% of the total on the nine interstate crossings.

A study of the hourly flow at the nine locations revealed that 4:00 PM to 5:00 PM was the peak hour of travel. A total of 6439 vehicles was recorded during this hour; 47.2 per cent were entering and 52.8 per cent were leaving Texas. This disparity in directional distribution was undoubtedly caused by the exodus of shoppers and commuters from the urban areas of Orange, Laredo and El Paso.

The number and percentage of vehicles of each type at the nine interstate count locations is shown on the following table:

VEHICLE TYPES AT NINE INTERSTATE LOCATIONS		
Type Vehicle	Number Recorded	Per Cent of Total Vehicles
Passenger Cars		
Texas	39,863	46.15
Adjacent States	13,758	15.93
Other States	16,526	19.13
Total Passenger Cars	70,147	81.21
Trucks		
Single-Unit		
Panel-Pickup	9,181	10.63
Other 2-Axle	1,167	1.35
3-Axle	195	0.23
Sub-Total	10,543	12.21
Combinations		
Semi-Trailer		
3-Axle	459	0.53
4-Axle	862	1.00
5-Axle	3,336	3.86
Sub-Total	4,657	5.39

Buses	509	0.59
Motorcycles and Motor-scooters	258	0.30
TOTAL VEHICLES	86,368	100.00

## EXPLANATION OF CLASSIFICATION REPORTS

The preceding summary tables have been extracted from the detailed vehicle classification reports for each of the ninety-nine state line crossings. Copies of the field forms are included in the following pages for the use of those who may desire to make detailed studies of a particular route or combination of routes. The hourly volumes shown are for a twenty-four hour period on the date indicated and are not adjusted to an annual average day.

Two record sheets are used for each count location. The first shows the hourly volume of vehicles of all types, the 24-hour volume and direction of movement. Inbound movement refers to those vehicles entering Texas and outbound to those leaving the State. In the second record sheet only passenger car data are shown. The number of passenger cars is shown with registration in Texas, the bordering state and other states. Bordering state registrations are subdivided into two categories (1) those registered in the county adjacent to the count location and (2) those registered in other counties of this State.

An index showing the location and page number of each count station precedes the record for each individual highway crossing.
