Annual Report *1970*

Permanent Automatic Traffic Recorders

conducted by the

TEXAS HIGHWAY DEPARTMENT
PLANNING SURVEY DIVISION

in cooperation with the

U.S. DEPARTMENT of TRANSPORTATION
FEDERAL HIGHWAY ADMINISTRATION

For Loan Only:
CTR Library

AUG 28 2012

NOTICE

This report has been prepared for internal use within the Texas Department of Transportation. Accuracy is limited to validity of available data as of the dates shown.

INTRODUCTION

The statistical traffic data contained in this report is a summary of information obtained from permanently located automatic traffic recorders (ATR) during the year 1970. These recorders are installed at representative locations on the various highway systems throughout the state with both rural and urban traffic characteristics represented.

The traffic information as presented in this report is the basis for the development of future traffic trends and volumes that are essential for highway planning and design. Further use of these data are made for purposes such as the conversion of short-term traffic counts to annual average daily traffic (AADT), the development of design hour volumes (DHV), directional distribution and "K" factor percentages.

An attempt has been made to present the data in a format most convenient to those using traffic information. All data contained in the report are based on twelve full months of operation at each recorder location and are shown by means of individual graphs and tables. No data are listed in this report for those recorders which did not operate twelve full months during 1970. This includes those recorders out of operation due to highway construction and new recorders installed during the year.

TABLE OF CONTENTS

Permanent Recorder Number	Location	Page
A001	US 80 3.0 Mi W of FM 157, Arlington	1-3
A004	US 81 2.6 Mi N of US 84, Waco	4-6
A005	US 80 2.1 Mi E of US 59, Marshall	7-9
A008	IH 35 0.7 Mi N of FM 1472, Laredo	10-12
A010	SH 20 0.3 Mi S of Loop 375, El Paso	13-15
