

A PROGRAM OF STUDY IN PAVEMENT MANAGEMENT
VOLUME I

TABLE OF CONTENTS

I. BACKGROUND AND INTRODUCTION

- Lesson 1 General and Historical Review of Pavements
- Lesson 2 FHWA Slide - Tape Presentation "Pavement Management"
- Lesson 3 Introduction to Pavement Management Process
- Lesson 4 The Systematic Approach to Pavement Management
- Lesson 5 Monitoring and Evaluation Pavement Serviceability - Performance Concepts

II. PAVEMENT DESIGN CONCEPTS

- Lesson 6 Pavement Load Carrying Concepts
- Lesson 7 Pavement Design Variables
- Lesson 8 Introduction to the AASHO Road Test - A Movie
- Lesson 9 Traffic and Truck Loading Data
- Lesson 10 AASHTO Load Equivalencies
- Lesson 11 Rigid Pavement Theory Stresses and Deflection
- Lesson 12 Rigid Pavement Behavior - Biharmonic Equation
- Lesson 13 Rigid Pavement - Westergaard Solutions
- Lesson 14 Subgrade Characterization
- Lesson 15 AASHTO Design Guide for Rigid Pavements
- Lesson 16 Guest Lecturer - To Be Announced
- Lesson 17 Flexible Pavement/Elastic Layered Theory
- Lesson 18 Computer Programs for the Analysis of Elastic Layered Systems
- Lesson 19 AASHTO Interim Guide for Flexible Pavements
- Lesson 20 AASHO Layer Coefficients

Revised WRH/lg 12/8/83

- Lesson 21 Subgrade Moisture Movement and Drainage
- Lesson 22 Generating Alternative Pavement Design Strategies
- Lesson 23 Life Cycle Costing and Economic Analysis
- Lesson 24 Economic Evaluation of Alternative Pavement Strategies

III. PLANNING, MONITORING AND EVALUATION

- Lesson 25 Pavement Inventory Data Collection, Equipment and Processing
- Lesson 26 Field Measurement of Serviceability and Roughness
- Lesson 27 Roughness Measurement Techniques
- Lesson 28 Condition Survey Methods and Use
- Lesson 29 Skid Measurement Methods
- Lesson 30 Developing a Combined Index for "Overall" Performance - Objective Function
- Lesson 31 Priority Programming

A PROGRAM OF STUDY IN PAVEMENT MANAGEMENT
VOLUME II

TABLE OF CONTENTS

IV. CONSTRUCTION AND MAINTENANCE

- Lesson 32 Effect of Quality of Construction on Pavement Performance
- Lesson 33 Development of Quality Assurance Specifications
- Lesson 34 Acceptance Plans, Assessing Quality Levels, and Pay Adjustment Factors
- Lesson 35 General Maintenance and Maintenance Management Concepts
- Lesson 36 Maintenance Policies and Standards (Decision Criteria)
- Lesson 37 Maintenance Materials and Techniques for Flexible and Rigid Pavements

V. REHABILITATION

- Lesson 38 Use of Field Monitoring and Evaluation Data in Design
- Lesson 39 Correcting Drainage Problems
- Lesson 40 Project Level Evaluation - Non-Destructive
- Lesson 41 Generating Alternative Rehabilitation Strategies
- Lesson 42 Overlay Design - General Concepts
- Lesson 43 Overlay Design - Theoretical Concepts
- Lesson 44 Guest Lecturer - To Be Announced
- Lesson 45 Joint Rehabilitation, Void Detection and Undersealing
- Lesson 46 Recycling Portland Cement Concrete
- Lesson 47 Recycling Flexible Pavements
- Lesson 48 Network Level Case Studies
- Lesson 49 Guest Lecturer - To Be Announced

- Lesson 50 Systematic Pavement Management - Project Level
- Lesson 51 Guest Lecturer - To Be Announced
- Lesson 52 Review of Existing PMS Practices
- Lesson 53 Implementing Pavement Management

VII. ADMINISTRATION AND RESEARCH

- Lesson 54 Communication Among Areas of Pavement Management
- Lesson 55 Typical Pavement Management Organization Within State Agency
- Lesson 56 Collecting and Identifying Research Needs Systematically
- Lesson 57 Experimental Design for Realistic Research
- Lesson 58 Variability
- Lesson 59 Technology Transfer
- Lesson 60 Applied Statistical Concepts
